Job Description Summary

Performs highly complex (senior-level) planning and research work. Work involves coordinating the development of regional water plans with regional water planning groups. Coordinates and manages planning grant contracts for development of regional water plans. Serves as liaison (non-voting member) of regional water planning groups. Provides technical and administrative assistance to regional water planning groups. Supports regional water project development teams and evaluating projects in loan application process. Assist in developing the state water plan. May supervise the work of others. Works under limited supervision, with considerable latitude for the use of initiative and independent judgment. Reports to the Manager of the Regional Water Planning Department.

Essential Job Functions

- Manages research and planning contracts for regional water planning and related studies to ensure contractors stay on track and assure work products meet the intent of the scope of work, rules, and statutory requirements.
- Reviews and evaluates planning deliverables for contractual, rule, and statutory compliance and approval.
- Performs other routine contract management duties such as reviewing and approving payment requests and ensuring timely processing of contract amendments, budget memorandums, or subcontracts.
- Collects, organizes, and analyzes data required in the development of plans or programs.
- Serve as liaison (non-voting member) and provides direct technical and administrative assistance to three regional water planning groups to facilitate the timely completion of their regional water plans and studies.
- Attends and represents the TWDB at all regular regional water planning group meetings and public hearings for assigned regions.
- Provides guidance to regional water planning groups on agency rule, statutory, and contractual requirements.
- Prepares and evaluates reports and makes presentations.
